

1

Plug 3.5mm audio jack all the way in on each split

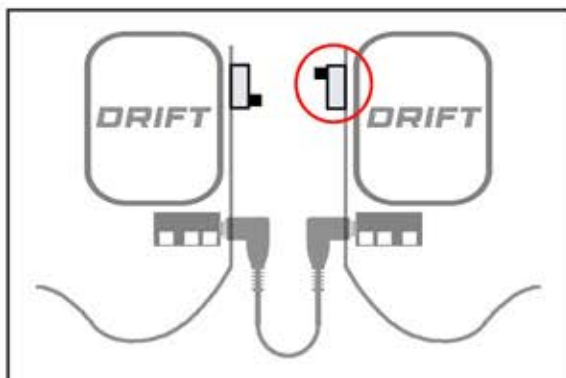

2

Set Master on Left Split

This is the default configuration when the drift keyboard is shipped. It means you connect the usb-c cable into the left half. **Wrongly setting or plugging may damage the keyboard, we are not responsible for such damages.**

or

Set Master on Right Split

You may set the right half to be master by setting the switches as shown on the left. **Setting the switches wrongly as shown below will again, irreversibly damage the keyboard.**

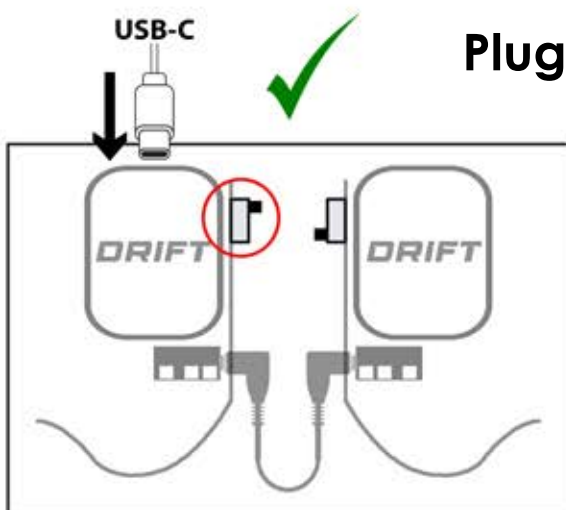

Both set to Master

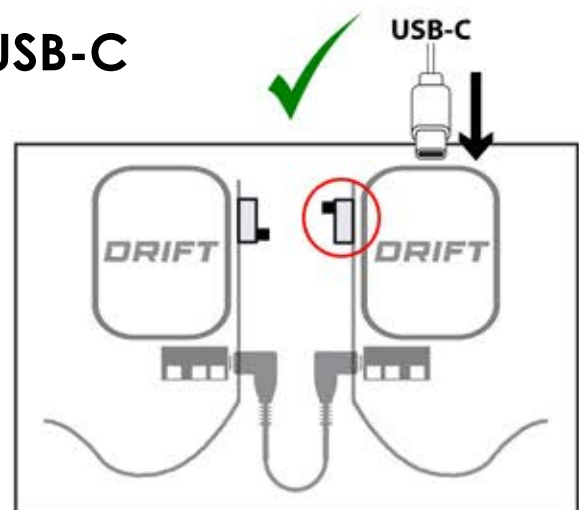

Both set to Slave

3

Plug in USB-C

or

!!!Always unpower/unplug the usb-c before unplugging the 3.5mm audio jack or setting the master and slave switches. Failure to do so will damage the split keyboard and we will not be responsible for repairs.
